/**
 * CyclingPortal implements CyclingPortalInterface; contains methods for
 * handling the following classes: Race, Stage, Segment, RiderManager (and in
 * turn Rider and Team), and Result.
 * These classes are used manage races and their subdivisions, teams and their
 * riders, and to calculate and assign points from riders' results.
 * Also contains methods for saving and loading (Mini) CyclingPortalInterface to
 * and from a file.
 *
 * @author Ethan Ray & Thomas Newbold
 * @version 1.1
 *
 */
